

# Le Trung Hieu

0961 500 817 | lthieu9601@gmail.com | lthieu.dev | github.com/lthieu96

Motivated Full-Stack Developer with over two years of experience specializing in building web applications. Proficient in modern JavaScript frameworks and back-end technologies, with a passion for continuous learning, and aiming to become a Senior Full-Stack Web Developer in the next two years.

## EXPERIENCE

---

### KVY Technology – Cerebro.xyz

1/2025 – current

Software Engineer

Ho Chi Minh

- Designed and implemented Cerebro's web application(Next.js) and scalable backend services(Node.js) to support rapid user growth, reaching **200K+ users** with **7K+ DAU**.
- Built and optimized core features for portfolio management and real-time data handling, ensuring performance, reliability, and a user-first experience at scale.
- Built an internal **Admin Dashboard** and **data collection system** to aggregate and manage portfolio data across **6 on-chain platforms** and **8 major crypto exchanges**.

### BenKon

4/2024 – 1/2025

Software Engineer

Ho Chi Minh

- Developed Admin Dashboard features and re-architected the system, reducing page load time by **30%** and improving code maintainability.
- Delivered and improved customer-facing mobile and tablet applications (BenKon App, Surface App), enhancing real-time device control, meeting room management, and overall user experience.
- Built internal platforms and tooling (CMS, I18n system, icon library) to improve content management, localization, UI consistency, and developer productivity.

### BenKon

10/2023 – 1/2024

Front-end Developer Intern

Ho Chi Minh

- Built an interactive floor plan and equipment layout editor (React, Node.js, SVG), owning the project end-to-end as a solo developer.

## SIDE PROJECTS

---

### GreenMaster Go | React, React Native, Ruby on Rails, PostgreSQL

Freelance Project

- Delivered an end-to-end **ERP system** managing **3,800+ customers** and **200 technicians**, digitizing service workflows and replacing paper-based reporting processes.
- Built real-time data synchronization across backend services, admin dashboard, and mobile app to streamline job assignments, service tracking, and customer communications.

### Express Boilerplate | NodeJs, Express.js, Typescript, MongoDB, JWT, OAuth,...

Github

- A boilerplate for building RESTful APIs. Feature: Authentication, authorization, validation, error handling,...

## TECHNICAL SKILLS

---

**Languages:** JavaScript, TypeScript, Ruby, SQL

**Frameworks:** React.js, Remix.js, React-router, Node.js, Express.js, Nest.js, Ruby on Rails, React-Native

**Developer Tools:** Postgresql, MongoDB, Git, Docker, Google Cloud Platform, VSCode, GitHub Action, Sentry

**Soft skills:** Planning, Continuous learning.

## EDUCATION

---

### University of Information Technology – VNUHCM

Ho Chi Minh

Software Engineering - GPA: 3.28/4

8/2019 – 5/2025

Projects showcase
